

# ARGUS LCX

Convenient Vital Data Patient Monitoring

**SCHILLER**

The Art of Diagnostics

# ARGUS LCX – Switch on and use it

**Comprehensive vital data patient monitoring is quite simple from now on. With the new SCHILLER ARGUS LCX the size of the LCD has been maximized, while the monitor depth is minimized to 77 mm. The result is a concise delineation of complex patient analysis.**

This ultraflat and x-tremely user-friendly patient-monitor can be mounted easily on a wall or medical cart. The device has a capacity of 2 hours mains independent operation, which makes it an ideal multi-parameter monitor to be used for inhouse transportation.

## Parameters:

- ECG: displayable leads I - VI
- Respiration
- Pulse oximetry (SpO<sub>2</sub>)
- Pulse rate
- Temperature
- Non-invasive blood pressure (oscillometric)
- Two invasive blood pressure measurements
- etCO<sub>2</sub> main- or sidestream (optional)

## Features:

- Very large display - 307 x 230 mm (381 mm diagonal)
- Built-in 3-channel thermal printer (optional)
- Software update with USB stick
- SD memory card
- Trends:
  - Standalone for 6 days
  - With central station for more than 15 days
- Alarm history
- No fan inside (noiseless operation)
- The ultrafast and calibration-free etCO<sub>2</sub> module can be installed later by the user. No technical changes necessary. Simply connect and use it.
- Standby and transport modes
- Nurse-call

Don't spend time in training - simply use it.

# ARGUS MPC central station – Everything under control

The optional central station is already configured and can be operated as easily as the patient-monitor. It monitors up to 64 bedside units and provides you with a wide range of printout options to document your patient's history including alarm history trends.

The optional A4 laser printer enables on the spot documentation of all important events, trends and other vital data interpretations. The unique function of printing a strip chart on A4 paper is very economic and makes documentation easier than ever before.

The easy handling and configuration of this central station provides you more time for your patients and a carefree day-to-day monitoring. ARGUS MPC central station is available as an option with a dual screen solution to provide you more detailed information.
